

A year's worth of drug approvals

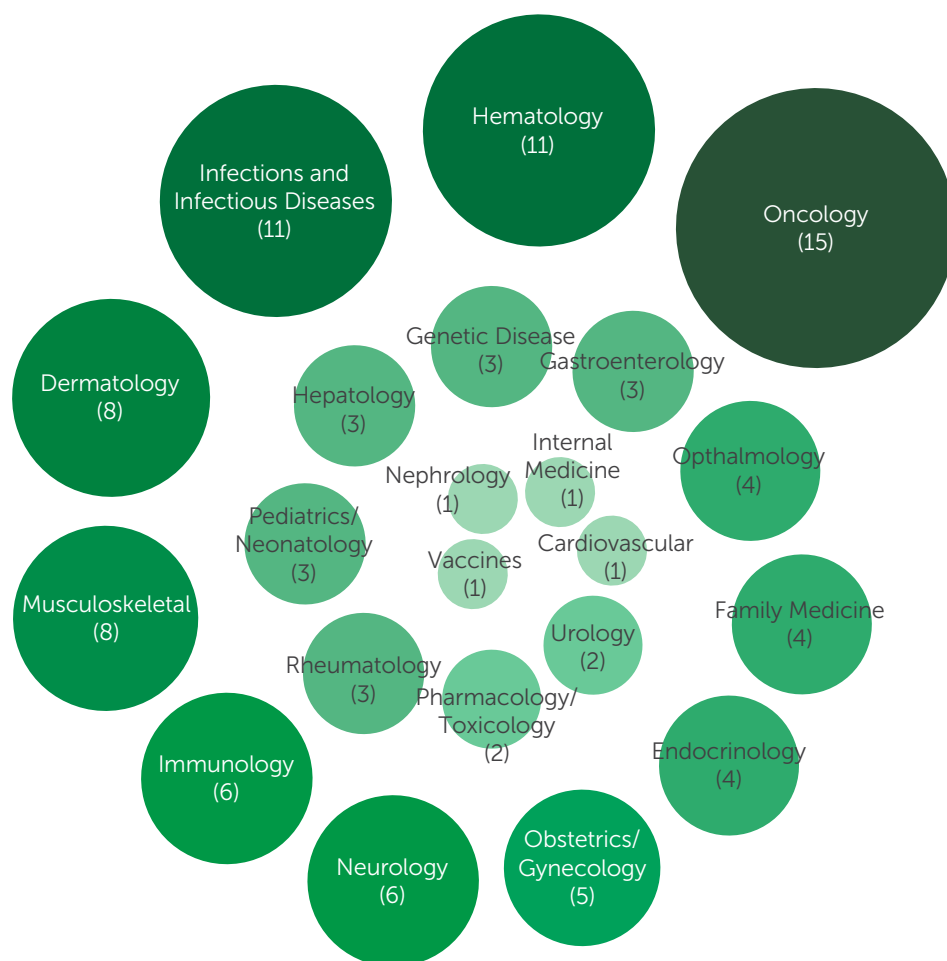

56 drugs were newly approved by the FDA in 2017. Oncology was most focused on therapeutic area, with 15 drugs approved for oncology applications.

A single drug can be considered to be under as many as four therapeutic areas.

- ▶ Bavencio
- ▶ Besponsa
- ▶ Calquence
- ▶ Idhifa
- ▶ Imfinzi
- ▶ Kisqali
- ▶ Kymriah
- ▶ Nerlynx
- ▶ Rydapt
- ▶ Vyxeos
- ▶ Xermelo
- ▶ Yescarta
- ▶ Zejula

"Some instances if there is no product launch, you will not do many studies or many promotional material reviews because you don't have a new product to be launched for the succeeding year. But **if you do have a product launch then you have to increase your budget. That's the main reason for the increases in most instances.**"
